***Election/Restrictions***

1. Applicant's election of Group II in the reply filed on 8-10-06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foulger et al (5,630,995).

Foulger et al teach a process of forming an anatase pigment by calcining hydrous titanium oxide in the presence of .2-.6 K<sub>2</sub>O and .2-.5 P<sub>2</sub>O<sub>5</sub>, see column 2, line 61-column 3, line 15. Furthermore, Al<sub>2</sub>O<sub>3</sub> may be added in amounts up to .2%to correct the color. The hydrous titanium oxide is calcined at 970° to 1020°C, see column 3, lines 45-17. Although alumina is not exemplified, one of ordinary skill in the art would have found the addition obvious because it is taught as a component to modify color. Furthermore the particle size of the hydrous titanium dioxide is not disclosed however the suspension formed by Foulger et al (column 2, lines 27-60) would be expected to have such a particle size.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1755

5. Claims 10 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 10 the terminology "using calcinations treating agents" is considered to render the claims indefinite since "using" is not considered to clearly define an active process step therefor the metes and bounds of the claimed process cannot be determined.

Also, line 4 it is suggested to delete "it" or clearly define the hydrous titanium oxide.
